Are you prepared?

Poisons, chemical spills, dirty bombs – these are real threats in today's hazardous world. The medical treatment of people exposed to toxic substances requires specialized knowledge and skills. Hospital and prehospital personnel need to be able to rapidly recognize the symptoms of exposure to particular toxic substances and immediately give specific antidotes or other appropriate medical treatment.

Advanced HAZMAT Life Support™(AHLS™) is the first and most comprehensive training program to provide medical professionals the critical skills necessary to effectively manage all aspects of hazmat exposure.

Only the best trained and best educated medical professionals are prepared to handle any emergency situation anytime, anywhere. Become a verified AHLS Provider and be ready to face the medical challenges of hazmat incidents, such as chemical spills or biological attacks.
